

Launching Academic Researcher

Starting a New Journal is not just a challenge but it is like catering a super long list of tasks that have to be dealt with skills only experience can dispense recognizing the accomplishments achieved today to become the basis for tomorrow's potential publication. The scientific journal is the basic need for any institute to enhance the research in health, promote interest by opening new avenues in the thinking process of the next generation of researchers and foster integrity in their research endeavors with an intention to improve future health conditions. Today publications are required not only for a myriad of opportunities to support ones' career but also it offers to stand distinguished among our peers in making exceptional contribution to the research community.

There are three R's of publishing; rapid, rigorous, review. Rapid; publishing new findings as quickly as possible, make a way forward for science. Secondly, research is also like selling vegetables best sold when fresh. Rigorous evaluation from the initial assessment up to the final editing, upgrade the status of the articles, ultimately enhancing the standard of the journal. Thorough peer review process of research findings promotes quality, improves clarity and guarantees publication.

The research culture in Pakistan is being highly encouraged by higher educational authorities to keep pace with current publication tempo of international research in the medical field. Higher Education Commission (HEC), with its transparent policies and a vision, not only offer incentives for publishing but also provide a complete guideline for the type and number of articles and their content. HEC ranking is to keep check on the quality of content and strict adherence to guidelines.

Academic Researcher is dedicated to facilitate quality peer review with the fastest timeline to ensure its recognition by various accrediting bodies. The editorial board members of Academic Researcher comprise of diverse expertise of clinicians, researchers and scientists to ensure high-quality and swift review practices. The timely and constructive comments on manuscripts not only help the authors to proceed but also provide a clear guideline for the editors for further processing. This arrangement in editing guarantees less than one month editorial processing and publication in the upcoming issue. The highly prestigious editorial team of Academic Researchers will be led by an exceedingly trustworthy person, our honorable Editor-in-Chief, who will be working closely along with global team of editors.

Academic Researcher, in recognition of the scholarly achievements of prestigious researchers and clinicians, looks forward to their contributions for the advancement of knowledge.

Dr. Saeeda Baig
Prof. of Biochemistry
Editor, Academic Researcher
